Save  
15 100 litres of  
**WATER**  
in one year!

Save  
45 litres of  
**CLEANING  
DETERGENTS**  
in one year!

Save 120  
**WORKING  
HOURS**  
in one year!

## Activa Control System - a brand new way to clean

Activa Control System is a new innovation that allows you to impregnate the mop directly on Hygienteknik's cleaning trolleys. The computer-controlled system helps you save time and cut down on water and chemicals.

With the help of the control panel, you can select the exact amount of ready-mixed cleaning chemicals you need for each mop. Just press the spray button and the spray nozzle inside the mop box will moisten the mop.

The mop is evenly moistened and you can choose how many millilitres of ready-mixed chemicals you wish to use (between 20-100 ml) per mop. Each mop can be individually impregnated, depending on the type of floor and just how dirty it is.

### Better results and a reduction in the consumption of chemicals and water

#### Control over cleaning results

Activa Control System impregnates each mop with exactly the right amount of liquid, depending on just how dirty the floor is.

#### Control over consumption of chemicals

The system reduces the use of cleaning detergents.

#### Saves time

The system reduces working hours by 5-8%.

#### Easy to handle

Activa Control System is easy to use and helps the user to work ergonomically.

#### Flexibility

Activa Control System can be used with most types of mops and cleaning detergents.

### See how much you can save!

#### Traditional system using ready-to-use mops

Working hours:

**2 080 hours/year**

Water consumption:

**15 600 litres/year**

Chemical consumption:

**46.8 litres/year**

#### The difference when you use Activa Control System

#### Activa Control System

Working hours:

**1 958 hours/year**

Water consumption:

**468 litres/year**

Chemical consumption:

**1.4 litres/year**

Save  
**15 100 litres of WATER**  
in one year!

Save 120  
**WORKING HOURS**  
in one year!

Save  
**45 litres of CLEANING DETERGENTS**  
in one year!

Cleaning area in the example above: 1800 m<sup>2</sup>

This is just one example of how much you can save by using the Activa Control System. Please contact us for further information.

## Climate smart cleaning with Activa Method Control

A cleaning trolley with a completely unique system for impregnating mops

Activa Metod Control, 29120

Activa Metod Control Mini, 29121

Patented product

Made in Sweden

The Activa Control System can also be used on other cleaning trolleys from Hygienteknik

The Activa Control System allows you to fit the latest technology for impregnating mops to our cleaning trolleys.

Features of the Activa Control System include:

- Control unit
- System box containing a dosing pump and battery
- Battery charger
- Empty container for ready-mixed chemicals
- Mop box 60 cm with spray ramp
